Classroom Innovation and Approaches to Learning

Presenters:

Professor Teri Balser. Dean Learning and Teaching, Faculty of Science and Engineering
Mrs Diana Taylor, Learning Engagement Developer, Faculty Learning Engagement Team (Science and Engineering)

Abstract:

The Office of the Dean Teaching and Learning (ODLT) including the Faculty Learning Engagement Team (FLET) for Science and Engineering would like to facilitate a workshop at Curtin’s Festival of Learning 2016 to launch the inaugural Science and Engineering Teaching Innovation Fellows initiative (SAE Innovation Fellows). Intended as a Faculty-level community of practice, the program aims to foster reflective collaboration, provide opportunities for professional up skilling, encourage the adoption of best practices and explore innovative teaching approaches. The Festival of Learning (FoL) workshop will be a catalyst to stimulate discussion regarding this year’s theme of Student Personalised Learning Approaches exploring what it means and what it might look like at a unit and course level. Academics from all disciplines are welcome to attend and engage in cross-disciplinary collaborations. SAE academics are welcome to further develop ideas discussed and submit an expression of interest to become an SAE Innovation Fellow.
