Innovations in eReserve

Presenters:
Mrs Linda Sheedy, Coordinator, Collection Access, Curtin Library
Mrs Julie Bayliss, Clinical Professional Fellow, School of Physiotherapy and Exercise Science
Dr Karen Miller, Lecturer, Department of Information Studies

Abstract:
eReserve is being transformed across the University through the implementation of new Reading List technology. Designed to enhance the student experience by providing students with personalised access to course reading materials and piloted since March 2016, this innovative new solution will be simpler for staff and more engaging for students.

This session will showcase new functionality not available with the current eReserve system including integration with Blackboard, single sign-on to resources, real-time communication with the Library, and embedded social collaboration tools. The session will share our findings into the impact on the student experience from the perspective of teaching staff and will provide attendees with a close-up look at this next generation reading list solution.
