Before, During and After - Student Engagement in a Flipped Classroom

Presenters:

Mrs Kerry Southerland, Clinical/ Professional Fellow, School of Nursing, Midwifery and Paramedicine
Mr Hugh Soord, Learning Engagement Developer, Health Sciences Learning and Teaching
Ms Helen Walpole, Learning Engagement Developer, Health Sciences Learning and Teaching

Abstract:

Want to find out more about the flipped classroom approach to learning and teaching? Come and join us as we take you through a complete lesson based on this pedagogical model. In this session you will have the opportunity to participate in the lesson and see how a number of different technologies can be used to support a facilitated discussion in both face-to-face and fully online modes. Our exploration of this lesson will enable you to see the flipped classroom approach both from a student and teacher perspective. And best of all, you will able to take a copy of the lesson to modify and use in your own Blackboard unit.
